Job Opportunity

---

Greetings!

My name is Deveki and I am with Metaworks (<https://www.metaworks.xyz/>). I found your projects on Github super impressive! So if you are looking for a new challenge, great! as our amazing client based in Berlin, Germany is looking for talented Backend Engineers to join their growing team.

***Here is a short gist on the job description:-***

- *As Senior Backend Developer (m/f/x) you will be working in a cross-functional team to ensure the continuous improvement of our web-based applications and actively develop new software solutions that support our business model*
- *You directly support us in reinventing our architecture, stay on top of the latest development trends and drive innovation by assessing as well as implementing new technologies and features*
- *You are a competent contact person for our product owners, give feedback as well as technical input on the user stories and therefore help us to create an outstanding product*
- *You understand yourself as a mentor who empowers your colleagues through methods of mutual learning, such as pair programming*
- *You take ownership for the entire development cycle from testing to go live and always support your team to find the right story split as well as technical implementation*
- *You constantly improve quality by following established engineering best practices such as test-driven development and site reliability engineering*

***What technologies they use, you ask?!:-***

- *You have gathered several years of professional experience developing with Go, Ruby or other backend technologies by working in different agile, cross-functional teams*
- *You are an expert when it comes to working in microservice architectures and have already worked with cloud environments*
- *You value "clean code" principles when implementing your ideas and are enthusiastic about backend development*
- *You think outside the box and have a strong getting-things-done mindset*
- *You strive to improve, whether this is about the code, the team or yourself and therefore communicate as well as collaborate proactively*
- *You are an absolute team player, like to share your knowledge and experience to others and appreciate an open feedback culture*

Would you like to know more about this opportunity? Please let me know and we can talk about it :)  
Just reply to this email and we can schedule a short google meet!

***\*\*\*If you are not interested, all the best in your current role :-), but please do spread this opportunity!***
